

Consent to a neurotoxin procedure

Texas · synthetic demonstration encounter

Encounter

Encounter: SYN-ENC-CLEAR-001

Patient: Synthetic Patient

Procedure: Neurotoxin injection

Performer: Synthetic Injector

Scheduled: 2026-08-28T14:00:00Z

Who is performing this procedure

Authority pathway: DELEGATED

The proposed performer is not the delegating physician. This procedure proceeds under documented delegation, a signed protocol, a patient-specific order, and an available supervisor.

What I am considering

I am considering an elective neurotoxin injection. The expected effect is temporary. Results vary, further treatment may be discussed, and choosing no treatment is an alternative.

Required disclosures

Disclosures cited for this encounter: 3

1. Temporary effect and alternatives

The expected effect is temporary. Results vary, and no treatment is an alternative.

Source: TX_NEUROTOXIN_2025_01_09

2. Who will perform the procedure

The care team must identify the proposed performer and explain the supervision pathway.

Source: 22 TAC 169.26; Texas Occupations Code §157.001

3. Teach-back and unresolved holds

Signing is not enough: the patient must demonstrate understanding, and unresolved safety holds stop progression.
